Working Group on
Interventional
Cardiology

Dear Colleagues,

As being Turkish Society of Cardiology, one of our prior goals is to update our colleagues' knowledge and develop their professional skills. For this purpose, we are organizing national and regional meetings and courses.

Our Interventional Cardiology Working Group have decided to be closer to our colleagues who cannot attend the National Meeting held regularly every year and also to organize regional meetings this year in order to communicate directly. The first of these meetings will be held in Gaziantep between 10th and 12th April 2009.

Another goal of Turkish Society of Cardiology being a member of World Heart Federation and European Society of Cardiology is to promote relations with countries in accordance with our historical and geographical position, to develop close relations and to become an attractive centre in our region in the field of cardiology. As a result, we are regularly organizing joint meetings and projects with the countries in Turkic World Cardiology Association, Balkan Countries and Caucasian Countries.

Our society wants to promote the relations with our friend and close neighbour Syria and will organize the Interventional Cardiology Working Group Applied Regional Meeting in Gaziantep with the collaboration of Gaziantep and Aleppo Universities and with the participation of Syrian Society of Cardiovascular and our Syrian colleagues.

We will be honoured with your participation in our regional and international meeting which will be held in Gaziantep, a modern tourist attraction and the city of tasty foods in our country.

Best Regards,

Prof. Mehmet Aksoy, MD
